# uLink

eSIM Provisioning and Data Management for 2G/3G/4G and LoRaWAN - Global coverage, multiple networks, intelligent billing, and IoT tools.

Features

- Connectivity management; control your SIMs from our online portal

- Data analytics and reporting; understand more about your data, control your budgets

- Global data access via multiple networks from a single SIM

- One bundle of data for all your SIM cards to share

- Geolocation services without the need for additional devices

- APN security, secure routing, and VPN capabilities

Diversity and Redundancy

Provide redundancy, diversity, and improve quality of service with uLink technology. Connect to any available network within the network list and when the connection is lost, the SIM will automatically seek a new network. No disruptions and reduced downtime, keeping you and your business operational.

Private and Flexible Networks

Manage and access your devices without third party apps with VPN capability on the cellular level to encrypt and secure your data. Fixed IP services are available at a set rate per year, with no burden on your data.

uLink Portal - Real-Time Billing, Usage & Event Logging

uLink's online portal allows you to monitor your eSIM status, check your data usage in real-time, and more:

- Manage your own usage budget, configure alerts, and set limits

- Individual and grouped SIM management helps to simplify your admin

- Analyse historical usage data to determine best performing networks and map for approximate geolocation

- Blacklist or whitelist access by country and activate or suspend SIMs in real-time

- Cost management - see your costs in real-time and take action without worrying about additional charges. All the tools you need to manage your fleet are available

uLink

Multiple Networks, One SIM

Zones	Areas	Countries	Operators
Zone 1	Europe	32	87
Zone 2	USA	1	3
Zone 3	World 1	61	88
Zone 4	World 2	83	134
Zone 5	World 3	62	73
Zone 6	World 4	56	71

- One flat rate per zone
- One eSIM can access multiple zones
- One bundle for an unlimited amount of cards

Compliance

- GSMA compliant
- ISO 9001

Market Applications

- Broadcasting
- Security
- Government
- Military
- Maritime
- Emergency Response
